

PROFESSIONAL SUPERINTENDENT CERTIFICATION

Prerequisites for the Professional Superintendent Certificate include a master's degree and Principal Certification. Students who meet these prerequisites and wish to seek certification as school superintendents should apply to the Department of Educational Leadership. Admissions may be limited. Applicants are expected to meet the GPA and GRE requirements for admission to the Graduate School for graduate work. Upon completion of the application and receipt of an official transcript of graduate work, an advisor will be assigned to develop a certification plan for the student. Students meeting the prerequisites can usually obtain certification as a superintendent by completing 12 semester hours plus an internship of six hours.
